

Beware Of 'Mercury In Retrograde'

1. When planet Mercury is in Retrograde – going in a certain direction – a few weeks every so many months, you need to watch out.
2. It can cause lots of negative energy and mishaps, such as falling out with friends/relations, misunderstandings, travel disruption and business problems. It is not a good time for buying a new house or car, or signing a contract, without there being a bigger chance of mishap than usual.
3. By looking at 'Mercury In Retrograde' on 'Google' internet you can find out in advance which weeks each year it is taking place, and be careful what you do.
4. When the 2019 general election took place it was said, on the news, that it was put off a month due to the MPs not wanting it to take place during a month of Mercury in Retrograde.
