

What Age Should People Drive At?

Many youngsters/teenagers have car accidents. Drive in the silliest and most dangerous of ways. Not realising what risks they are taking until it's too late. Many lives are being lost.

Also many OAP's/People 80+ are driving terribly slow, holding up lots of traffic. As well as speed driving Over-slow driving is dangerous, causes accidents – even deaths in some circumstances.

Wouldn't it be a good idea – AND SAVE MANY LIVES – if driving was restricted to people aged 20 years old to 80 years old. No one younger or older should be allowed to drive.
