

Central Midfielder Darren Fletcher

- 1) Darren Fletcher in July 2000 joined Man United
Though for a while with a constant injury he was not too delighted
He performed much better for you and me
When he made his debut in March 2003
- 2) Darren as a central midfielder was to develop very well
And be one of the most consistent performers
In what the future had to tell
Both Man U and Scotland he deeply helped out
And did that without a single bit of doubt
- 3) Darren has with Man U won four Premiership Trophies yes
Him in plenty of matches done well or so I guess
He's set up many a striker to score a goal
And on his own has scored twenty three so far on the whole
- 4) Darren has suffered a lot of injuries over the years
Which has brought to his colleagues and Sir Alex lots of fears
But fortunately in what time has had to tell
He's usually recovered and got back to playing well
- 5) Darren now back in the Man United and Scotland teams
Is deeply hoping to help them both fulfil their dreams
Him with his team mates intends to shake lots of others up
To time and again win plenty a great cup
