

In The Countryside

- 1) In the Countryside via sun and rain
There blossoms many a daisy flower time and time again
There's also plenty of green grass in the Spring and Summer
Whilst in the Autumn and Winter it gets much glummer

- 2) There's many a nice leaved tree too
Which bird and nest wise attracts quite a few
Also to them is many a trunk and branch
Some positioned at a ranch

- 3) In the Countryside of quite a few
There's many an animal creature too
And everywhere different types of birds in the sky
Flying widely without any kind of a lie
