

Sing, Sing A Song

- 1) There's a DJ on the radio each day
Playing many a song with no delay
Lots of them covering love and romance
At which people often have a good dance

- 2) At discos you get DJs too
Where dancing together you get oh quite a few
They're moving to each and every note
Whilst occasionally having a glass of beer down their throat

- 3) There's different music instruments to be seen
Though mostly guitars, pianos and drums there's been
Each of them playing a certain type of sound
Which has nice voices singing along to be found

- 4) You get plenty a single singer or group singing along
Very often a really good song
Sometimes with an opera taking place
Which brings a lively smile to everyone's face
