

The Wind Is A Bit Of A Blow!

- 1) When there's a gale force wind having a go
It's quite a bit of a blow
Everything entirely being wind threatened
Instead of usually being just a sunny day or with rain wettened
The wind blows here there and everywhere

- 2) When it comes to trees falling over roads
There is, in some areas absolutely loads
Also you wind 'I beg your pardon'
But you've blown many a fence over my garden
The wind blows here there and everywhere

- 3) Although a very strong wind is a bit of a blow
It's nowhere near as bad as a strong tornado
Which would be very hard to manage
With even buildings having damage
The wind blows here there and everywhere

- 4) Along with the wind causing a bit of a mess
In it there's something people can enjoy doing or so I guess
Such as sailing in the water
Or getting your kite up like you ought ta
The wind blows here there and everywhere
